

ASSOCIATION OF
GENETIC TECHNOLOGISTS

Dear Peter,

I wanted to express my sincere appreciation for taking the time to address the attendees of the 2009 Association of Genetic Technologists 34th Annual Meeting in Jacksonville, Florida. THANK YOU for kicking off our conference with so much laughter and insight with your keynote speech: *How to Over Come Adversity in the Workplace with Humor!*

I received nothing but kudos on your presentation and it really set the positive tone for the rest of the conference. You really did your homework on our field and presented us with the golden nuggets of humor that we sometimes take for granted with our tedious workload.

Your improvisational ability truly showed as you weaved in and out of entertaining stories, yet still kept up audience participation. And at 8:00 in the morning no less!

Your seamless delivery and content gave our attendees real value. I highly recommend your speaking talents to any association or company that needs a memorable presentation for their conference.

Please accept my many thanks on behalf of the attendees for your address, and for adding so much to our meeting!

Warmest regards,

Marianne Hausman
